# Maximize Your Productivity

Toshiba offers a productivity-enhancing telephone solution to meet your specific needs, no matter what size or type of business you have. Just as important, our full line of telephones provides the industry's strongest solution to meeting your changing telecommunication needs as your business grows. And all Toshiba telephones are compatible with all Toshiba systems, even if you upgrade to a larger system. All of which fully protects your investment in Toshiba digital telephones. Plus, proven Toshiba quality and reliability are built into every telephone we offer. Each model is rigorously tested in real-world conditions, so you can depend on your Toshiba digital telephone system's performance day-in and day-out.

All our telephones provide flexible features and options that maximize ease of use and your employee's productivity, which maximizes your profits.

# Digital Display

Our LCD Digital Speakerphones include easy-to-read feature prompting, which makes feature access and use easier by displaying simple, clear instructions on the telephone's LCD screen. This reduces training time and makes sophisticated features user-friendly.

Our Digital Display Speakerphones cost-effectively provide all the telecommunication functionality you need. These sophisticated telephones enable you to program calling features and speed-dial numbers for fast one-touch operation. They're available in your choice of 20-button or 10-button 2-line display models or a 14-button 8-line display model to match the level of functionality you require.

10-button Digital Speakerphone

Single Line Digital Telephone

All Toshiba telephones are ergonomically designed with easy-to-reach, easy-to-read feature buttons. You can even perform several feature-operation sequences by pushing a single button, saving valuable time.

Our 10-button and 20-button Speakerphones provide full functionality for all types of calls. And their state-of-the-art technology allows you to converse via the speaker as effectively as if you were using the handset! In addition, the full-duplex speakerphone model with external microphone is a valuable tool for conference room and demanding, high-performance speakerphone applications.

LCD Digital Speakerphone  
with Optional DSS Console

20-button 2-Line LCD Digital  
Speakerphone with Optional  
Add-on Module

Your operator can quickly answer and transfer calls using our 20-button LCD digital speakerphone equipped with an optional 20-button Add-on Module or 60-button DSS Console, depending on the number of telephones and lines you have.

You can program these buttons to provide busy station status indication, direct station dialing and transfer, speed dialing and frequently used calling features, enabling your operator to perform fast one-touch call processing.

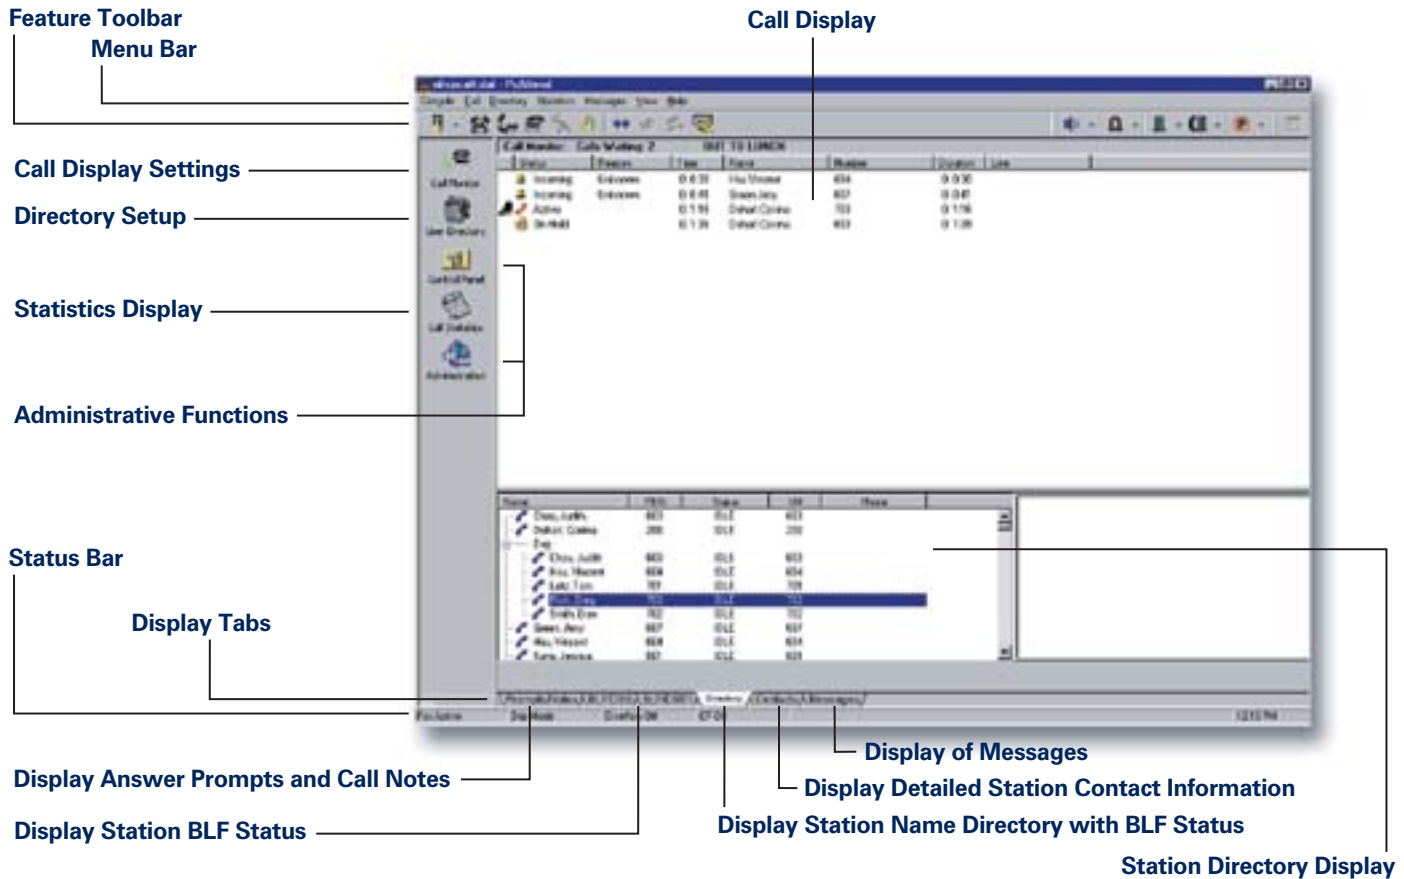

Our 20-button Add-on Module is also the ideal, cost-effective solution for any employee who needs the capability to use an expanded amount of calling features with one-touch convenience.

# CTX Attendant

## Console

Processing incoming calls with speed and efficiency is mission-critical for businesses with high call volumes. The CTX Attendant Console delivers the optimum solution, simplifying the complex process of answering and transferring calls for multiple lines on the Strata CTX system.

## Advanced Features Maximize Operator Efficiency

The CTX Attendant Console operates as a Windows® application on your PC, providing advanced, easy-to-use features that enable your operator to accurately process calls quickly:

- Answer Button with Answer Priority and Queuing
- Emergency Call Priority
- Programmable Buttons allow one-touch operation of the features you use most
- Day/Night Mode Switching
- Message Center/Voice Mail Transfer
- Call Waiting Count
- Call Status Display With Timer
- Internal Name/Extension Directory
- Outgoing Speed Dial Directory
- Busy Lamp Field enables your operator to see station status at a glance
- Icon indicators simplify monitoring of various status conditions

## Answer And Route Each Call Appropriately & Quickly

The CTX Attendant Console displays Caller Identification and Dialed Number Identification Service, so your operator will know who is calling, for whom, and where to transfer each call. This capability is a must for efficiently routing calls to your facility's different departments.

All CTX Attendant Console functions can be accessed either from the keyboard or by clicking screen buttons or icons, with headset or handset operation — the choice is yours! Plus, Toshiba's Strata CTX system seamlessly integrates up to four consoles, automatically distributing the load of incoming calls.

Cordless Digital 900 MHz  
Narrow Band Telephone  
provides excellent range  
at an affordable price.

# Digital Telephones

Toshiba Cordless Digital 900 MHz Telephones are custom designed to provide most functions of a Toshiba digital desk phone. In fact, they are the only cordless phones that give you access to these advanced features:

- Can share the same station port and extension number with your digital desk phone, enabling you to use either telephone as needed.
- Follows the same call forwarding and station hunting sequences.
- Switch between your cordless and digital desk phones, even during a call!
- LCD displays Caller ID information and concise feature-operation instructions which simplify feature use.
- Provides four feature buttons you can use for multi-line access or to program directory numbers, CO lines or the calling features you use most.
- Significantly longer range than conventional cordless phones.

---

## Go Mobile With The Advanced Features Of Your Toshiba Digital Desk Phone

Maximum security is also built into the Toshiba Cordless Digital Telephones. Spread-spectrum technology and narrow band technology minimizes outsiders' ability to scan the phone's frequency range, safeguarding your private conversations.
