Voice Processing Solutions Improve Your Operational Efficiency

In today's communication-intensive business world, voice, fax and e-mail message traffic is increasing dramatically. As a result, the need to manage that huge message load is more critical and complex than ever. To meet this growing need, Toshiba developed the Strategy Enterprise Server (ES). It's Toshiba's most advanced voice processing system, providing an innovative approach to managing and distributing your voice, fax and e-mail messages, as well as offering self-service transaction capability for your customers.

By putting these sophisticated voice-processing solutions to work for your business, you'll improve the efficiency of your operations and increase your staff's productivity. Strategy ES delivers a full range of state-of-the-art communication capabilities, all in an easy-to-use Windows® interface.

Strategy ES Versatility Protects Your Investment

Strategy ES is available in a variety of configurations, making it easily scalable to your unique requirements. As your needs change, you can simply add new voice-processing applications, such as Speech Recognition and Text-To-Speech. The Strategy ES modular design lets you add applications without requiring significant hardware upgrades.

Plus, Strategy ES integrates with your existing LAN, PBX, and software applications, and you can count on reliable system performance day-in and day-out. The Strategy ES integrated solution also means you'll have one trusted source to support your telephone, messaging, computer, and self-service transaction systems. All of which ensures a continual return on your Strategy ES investment.

The Toshiba Strategy ES system includes state-of-the-art hardware and software from Dialogic®, an Intel® company that is a leading supplier of telecommunications products. Dialogic's proven Single Computing System Architecture (SCSA) is a key factor in the Strategy ES system's ability to deliver both high-performance voice processing and maximum value for your investment. These advanced hardware and software components provide the high-tech solutions your business demands.

Maximize Your

Investment

Process Voice, Fax And E-Mail Messages From Anywhere

Strategy ES gives you total communication control by letting you manage all messages from one place. Now you can retrieve, send and reply to messages any time – with a desktop or laptop PC, land line or mobile telephone, or via the Internet – from your office, home, car, hotel, airport – anywhere! By accessing, processing, and prioritizing information more efficiently, your employees will save time and money, maximizing their productivity.

Generate Revenue And Reduce Cost By Automating Information Access

Strategy ES enables you to offer your customers self-service transactional capability and information access. With these capabilities, you can deliver the information your callers need, when they need it. As a result, you can provide quality customer service and generate revenue around the clock. These capabilities also enable your employees to concentrate on productive tasks, and let you expand your business hours without adding staff.

Make Strategy ES Work For Your Unique Requirements

You can combine any of the Strategy ES system's individual features to work together, meeting your exact communication needs. Plus, Strategy ES provides system-activity reports that help you make system-management decisions to streamline your operations.

Discover The Details That Make The Difference

The Strategy ES Interactive Tutorial and eBrochure reveals all the details you need to know about Strategy ES applications and specific features, all in an interactive, easy-to-use CD-ROM. Contact your local Toshiba Dealer today to get your free Strategy ES CD-ROM or visit our web site at www.telecom.toshiba.com. In every successful business there is a strategy. How about yours?

Tradition
